

# Overview

The Nutanix landscape of products and services

# Core Platform

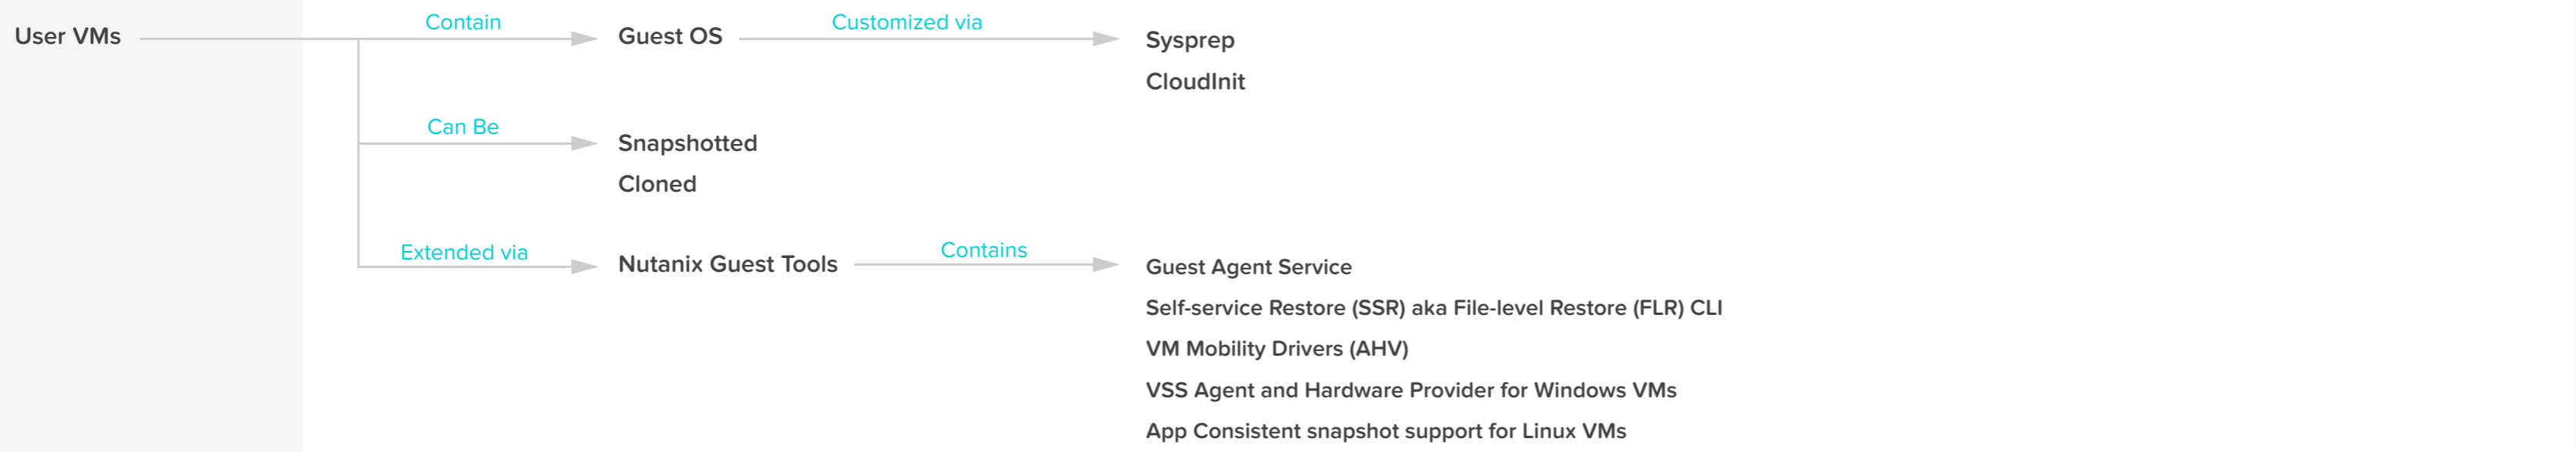

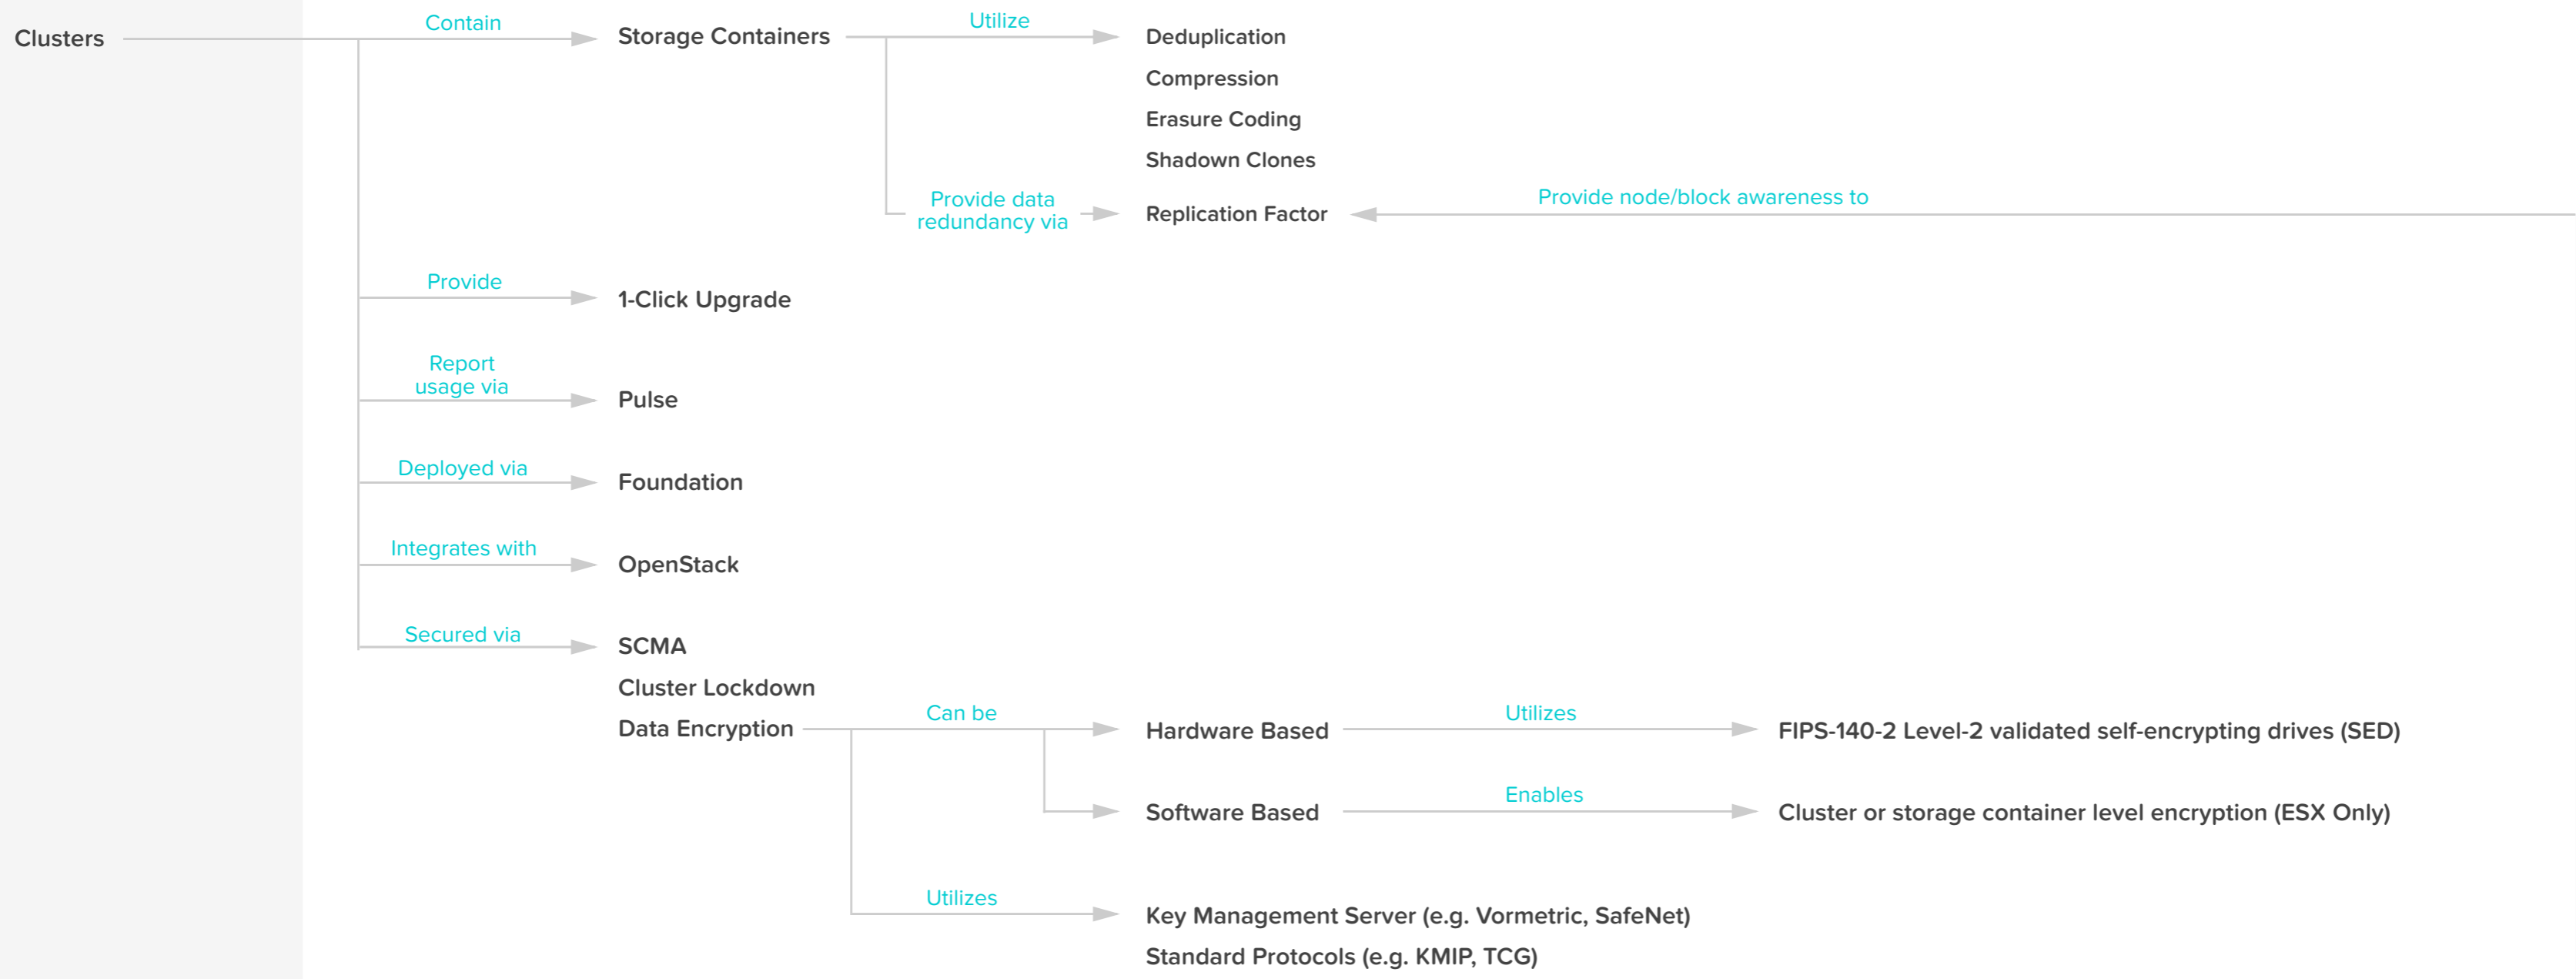

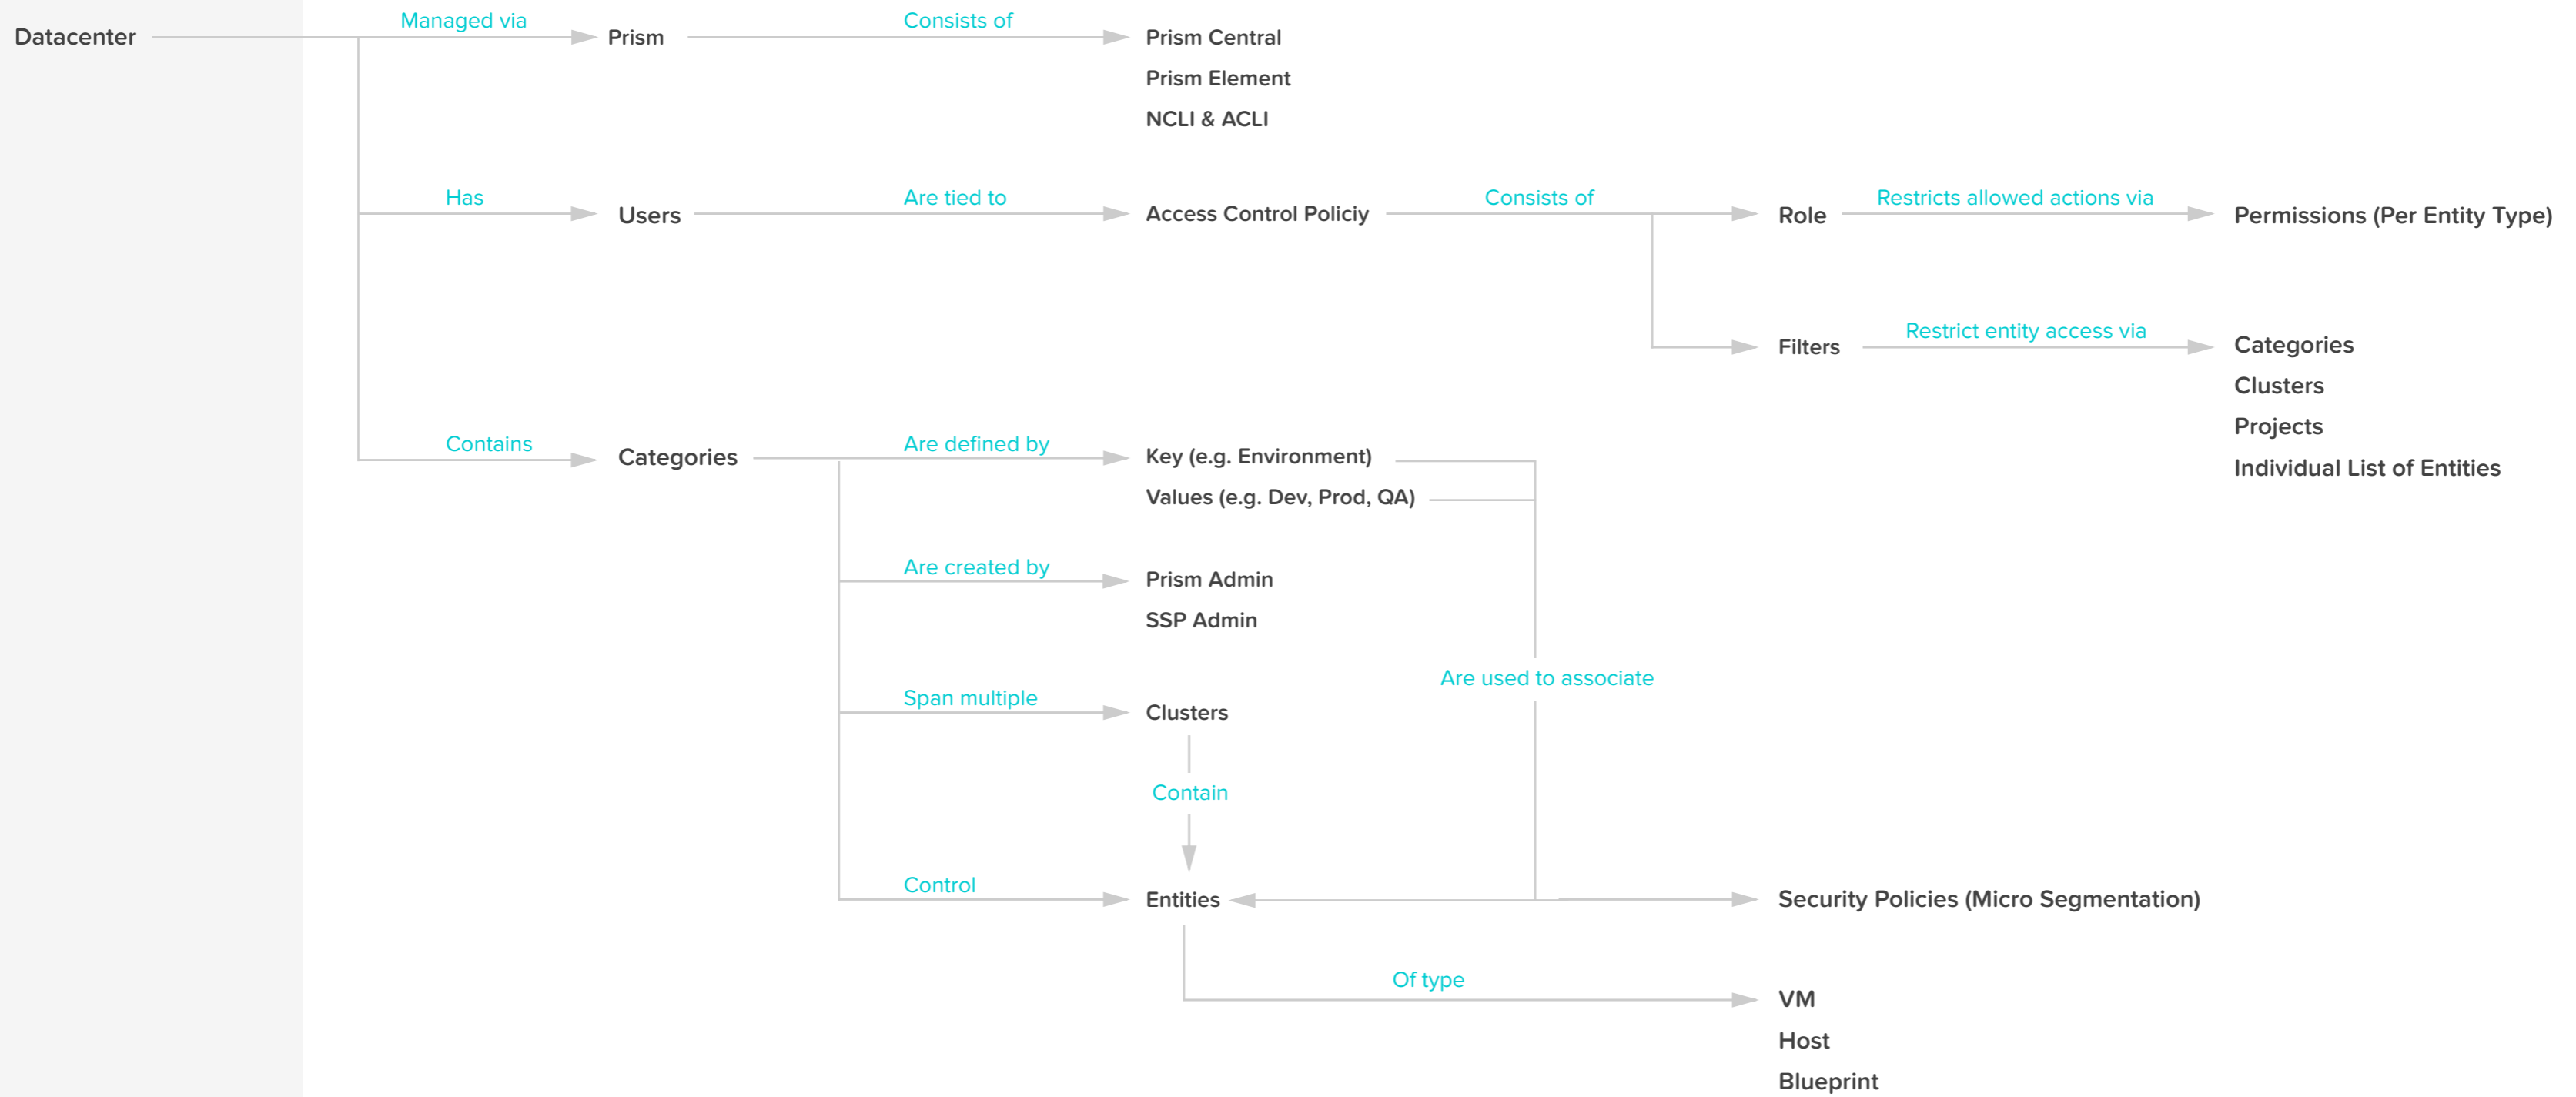

The core building blocks of web scale infrastructure

# Basic Services

Standard capabilities built in to the platform

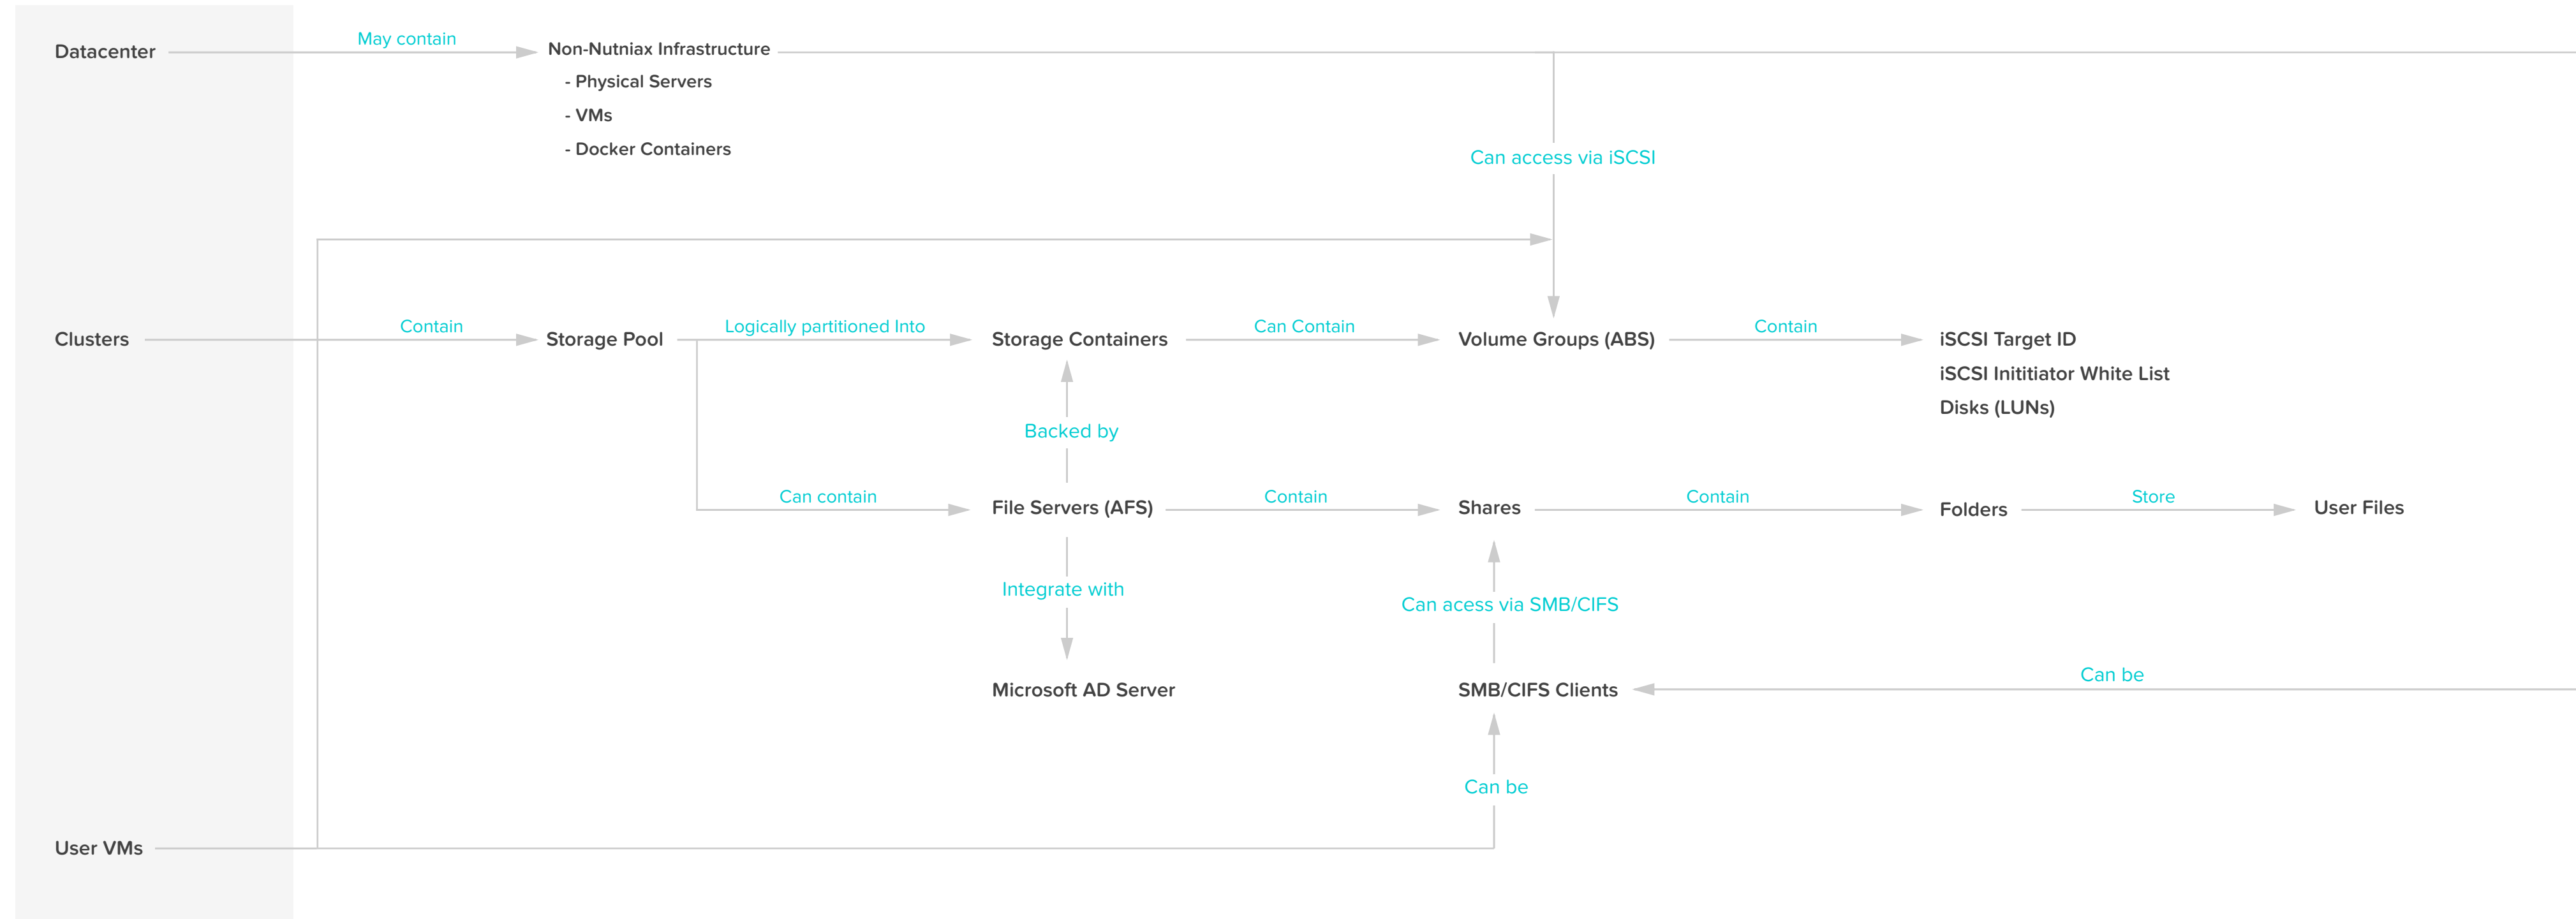

## Core Nutanix Platform

# Storage Services

File and block level storage capabilities for Nutanix and non-Nutanix infrastructure

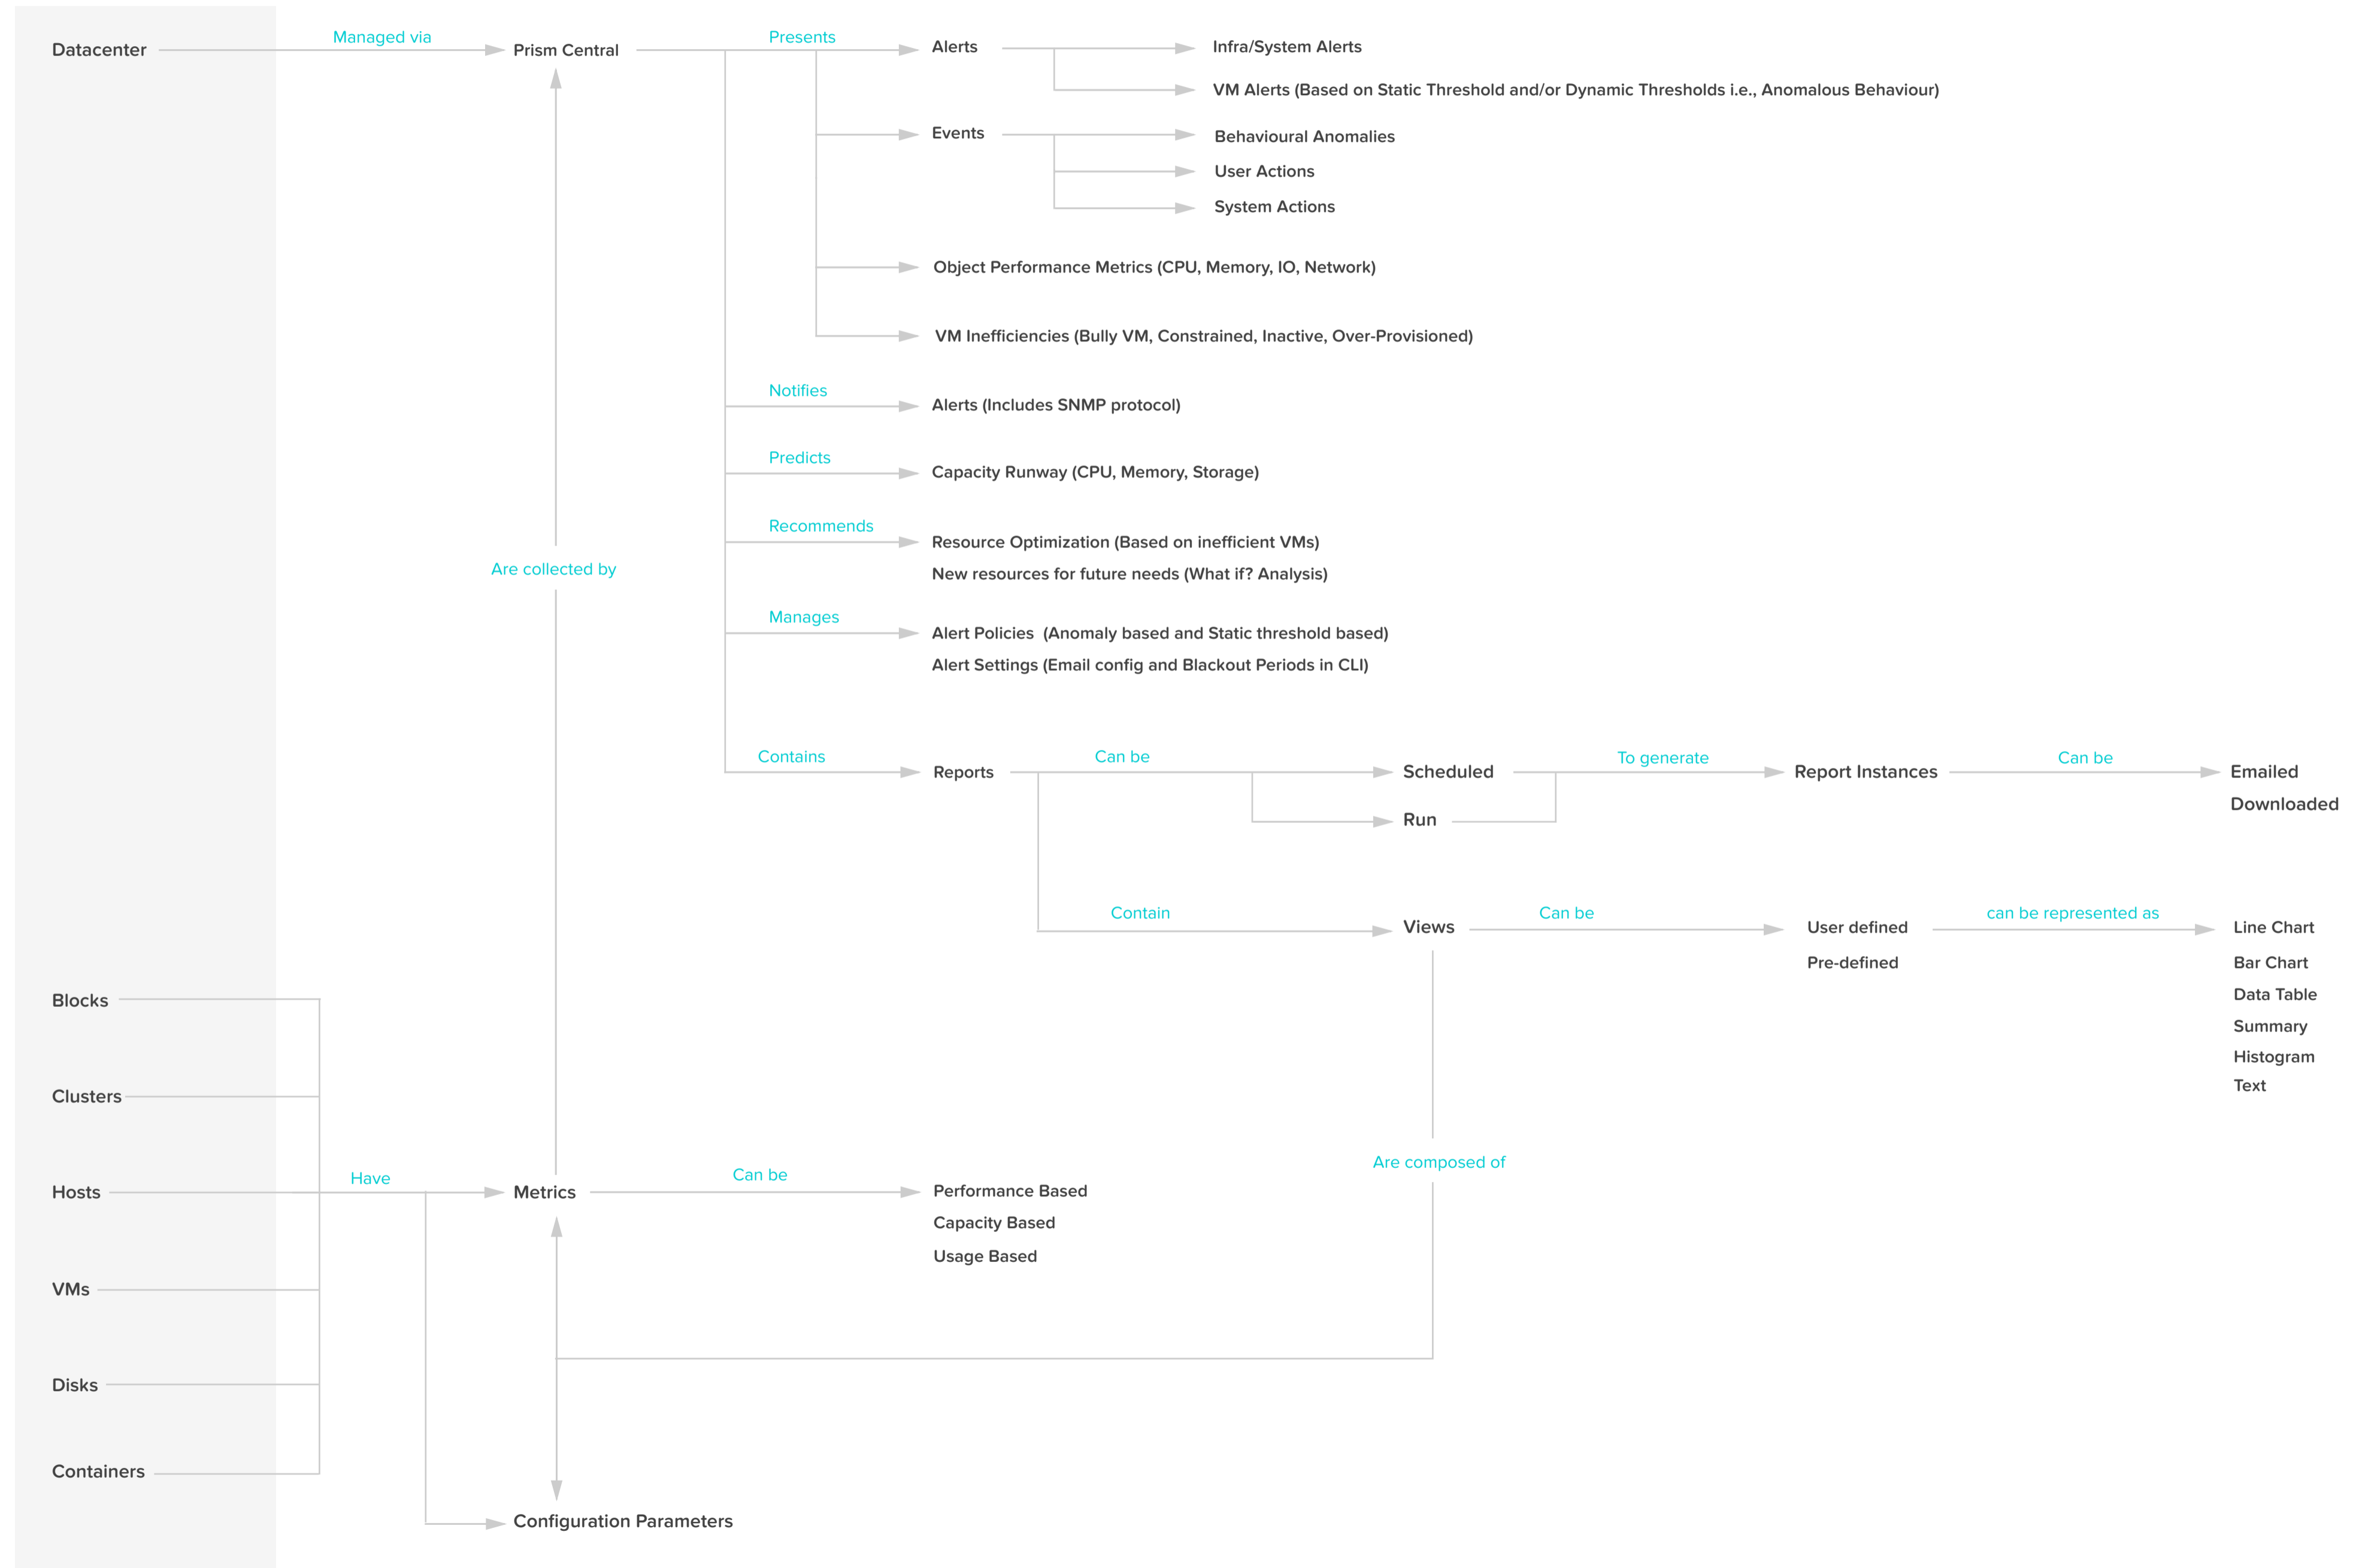

## Core Nutanix Platform

# Analytics & Reporting

Troubleshoot, analyze and plan your data center for the future

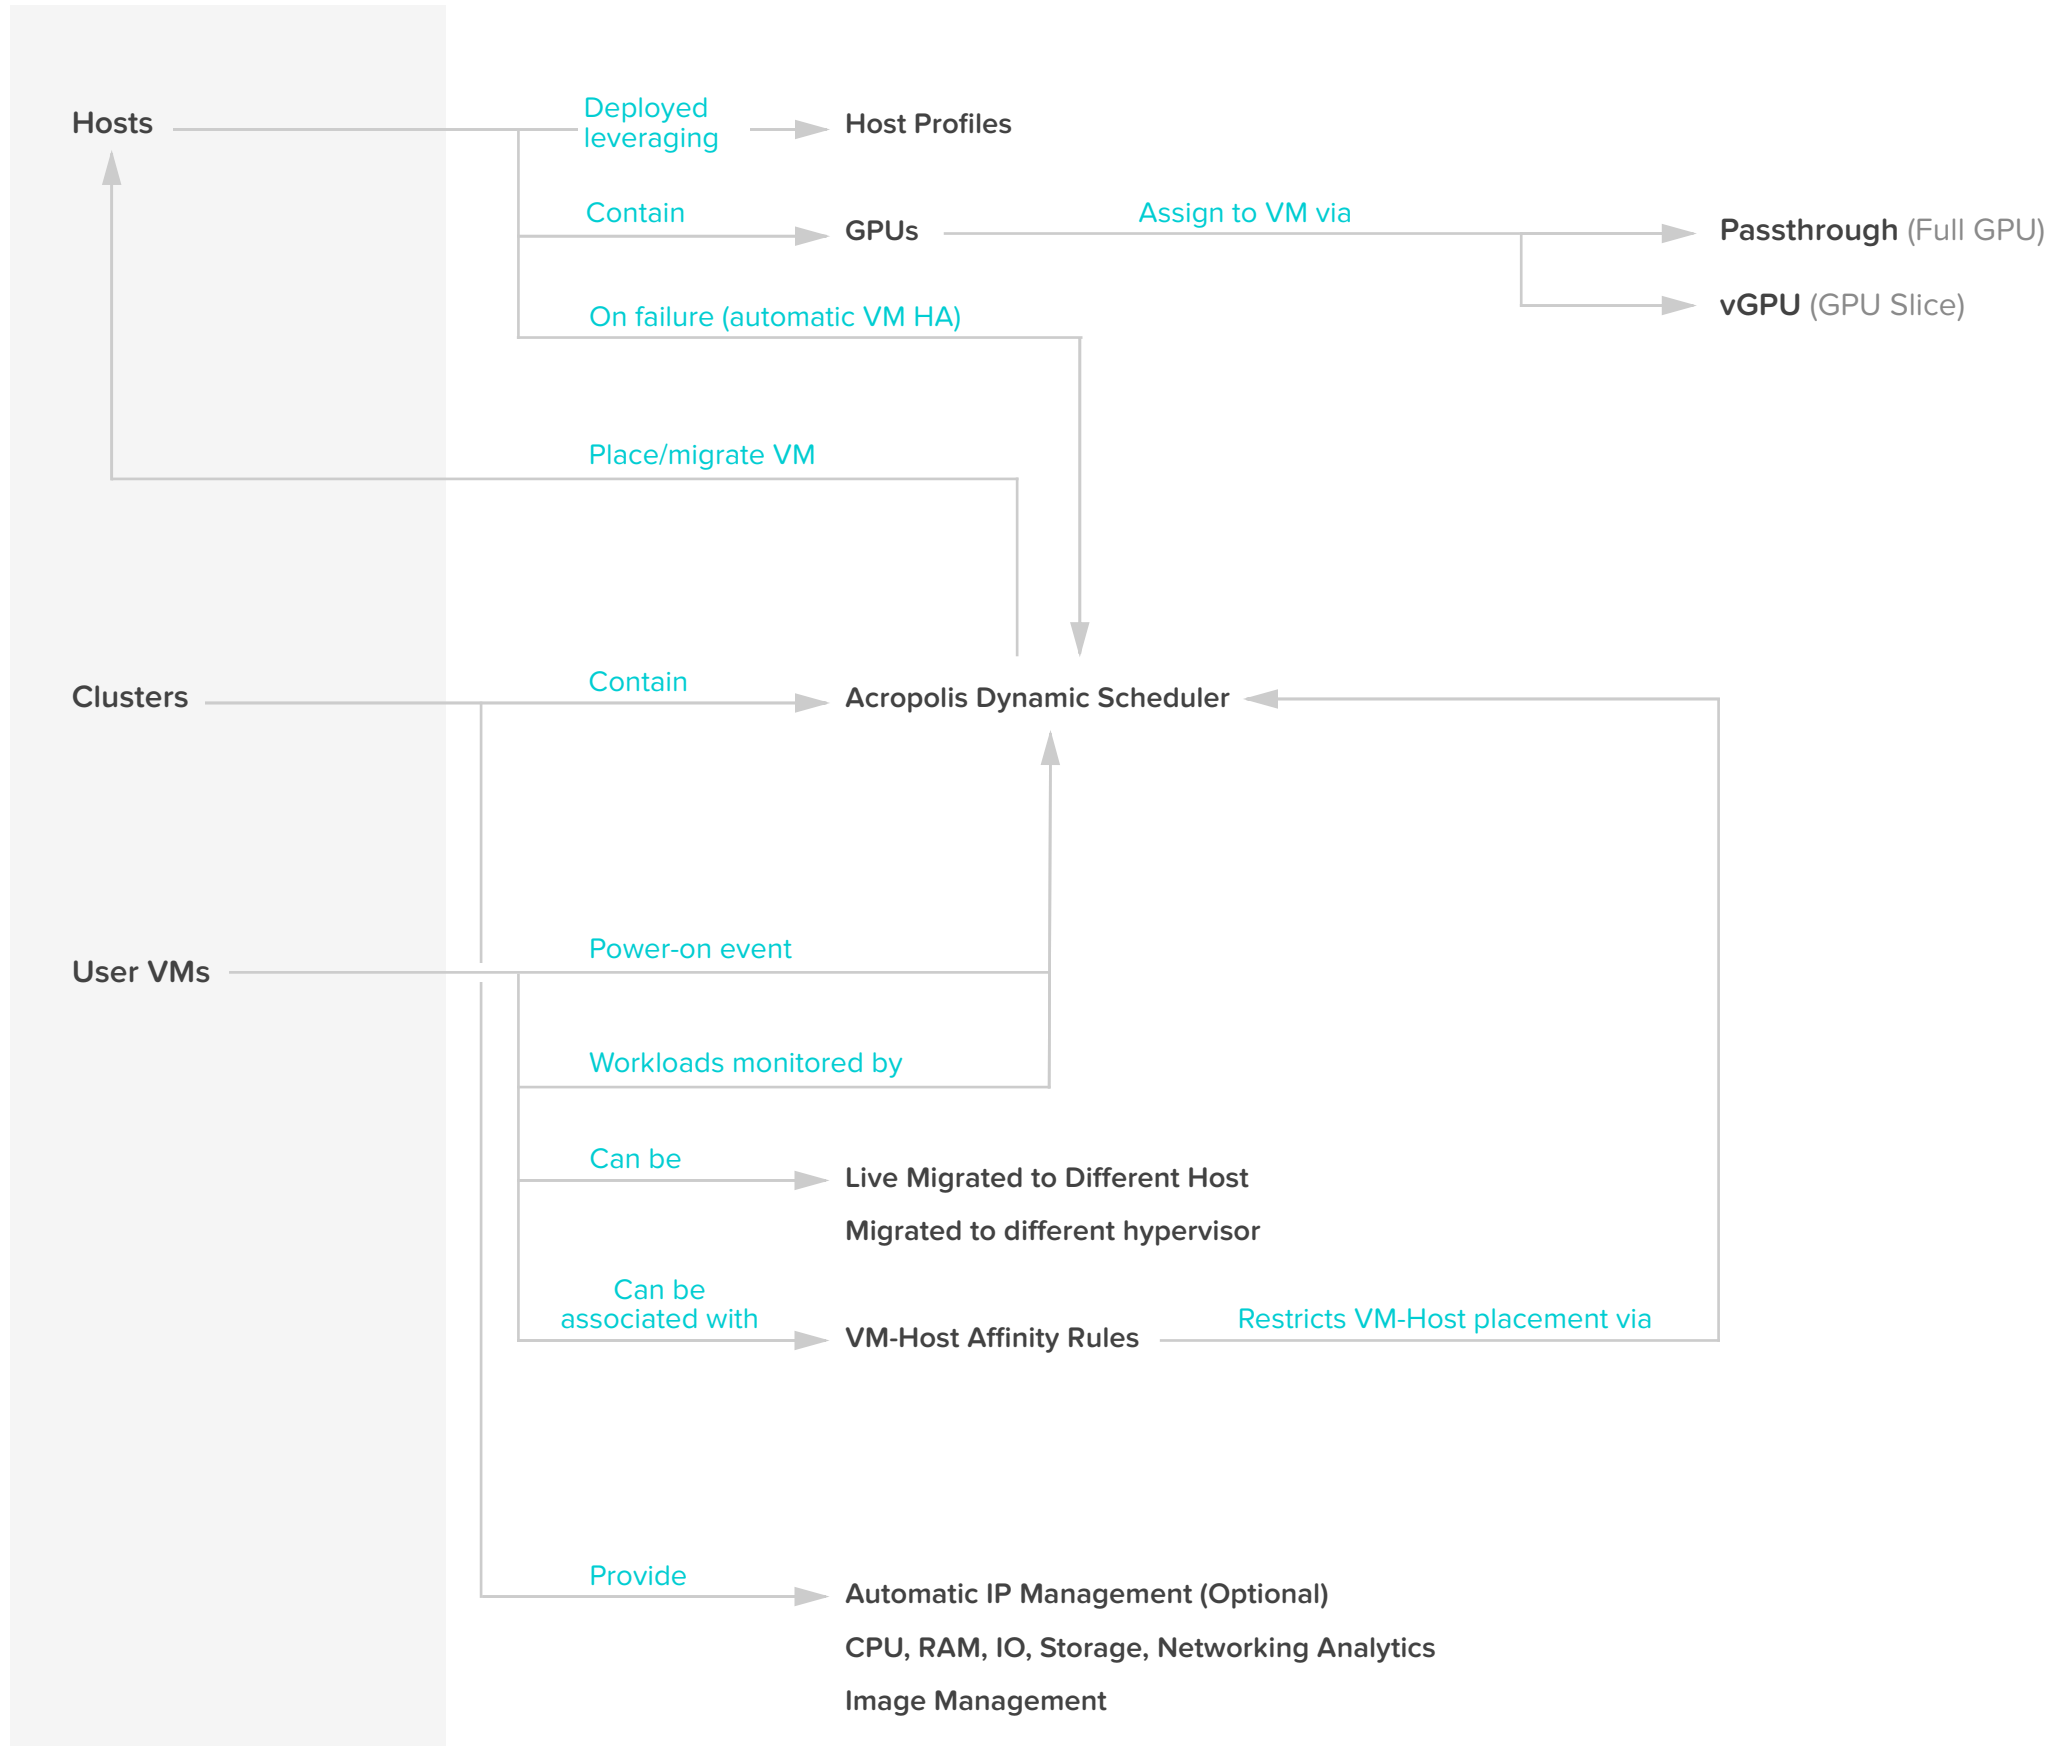

## Core Nutanix Platform

# AHV

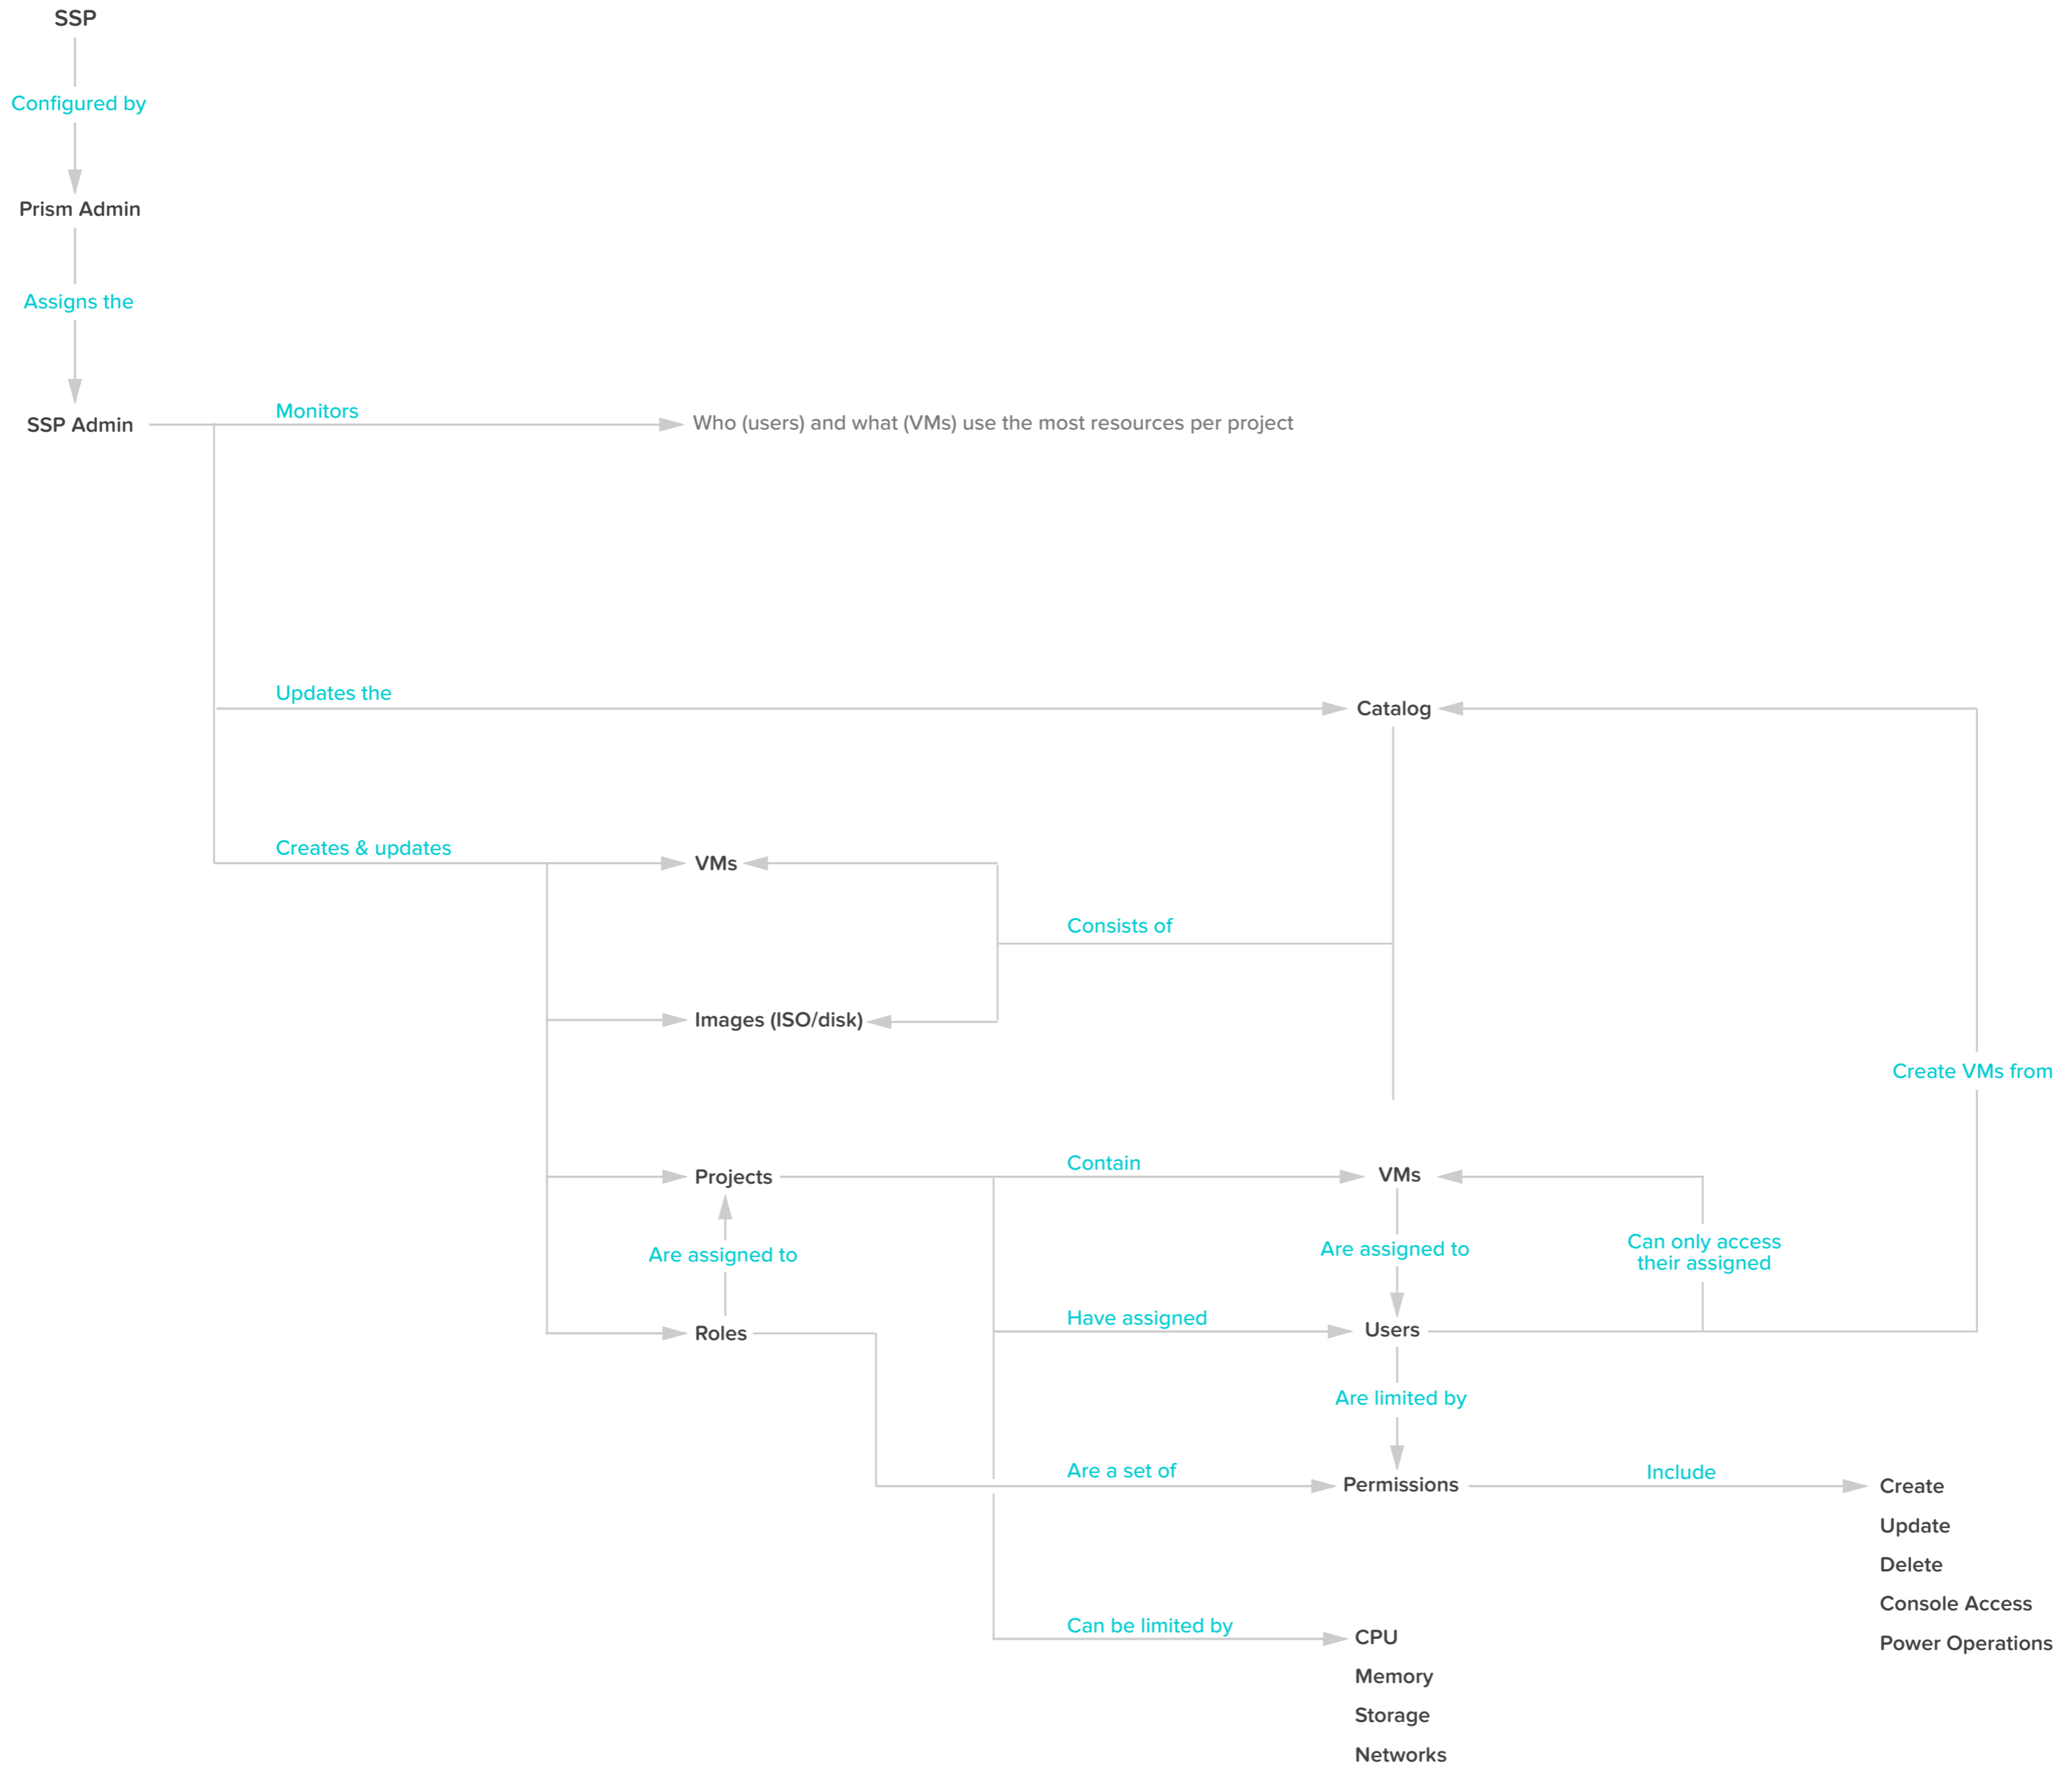

Nutanix hypervisor optimized for hyperconverged infrastructure

## Core Nutanix Platform

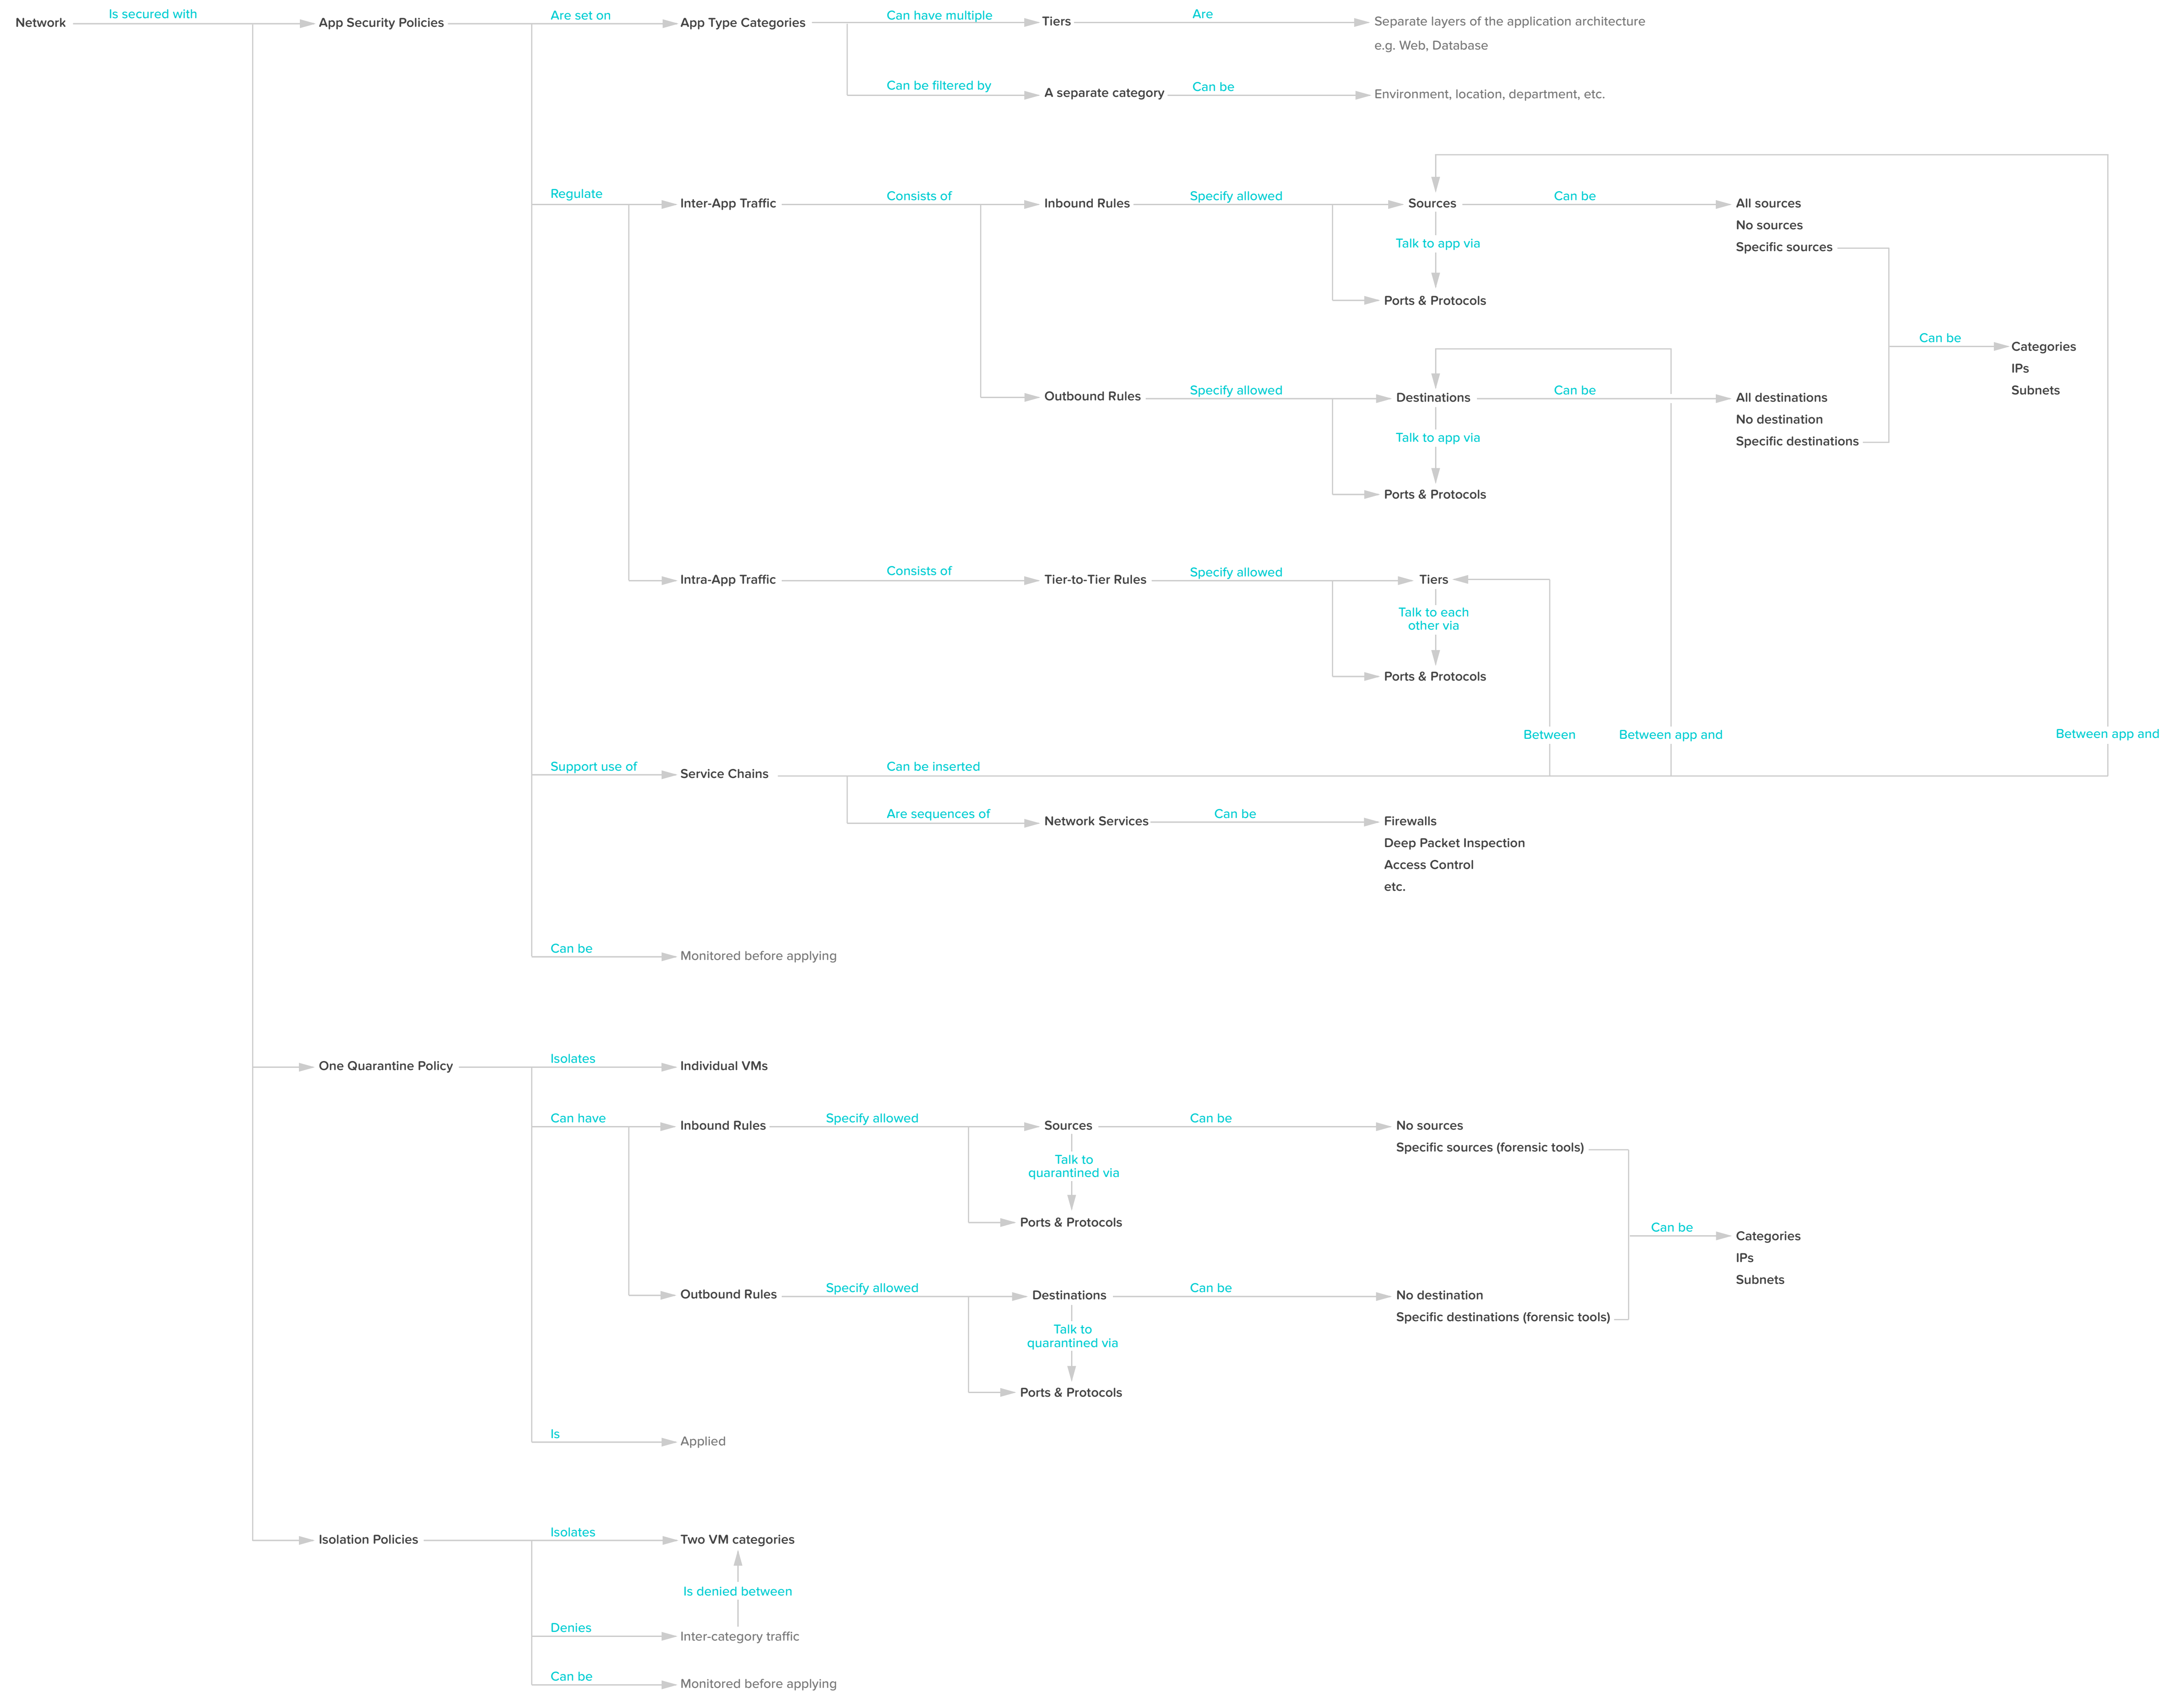

# SSP

Allows individuals to provision apps and VMs without IT intervention

# Micro Segmentation

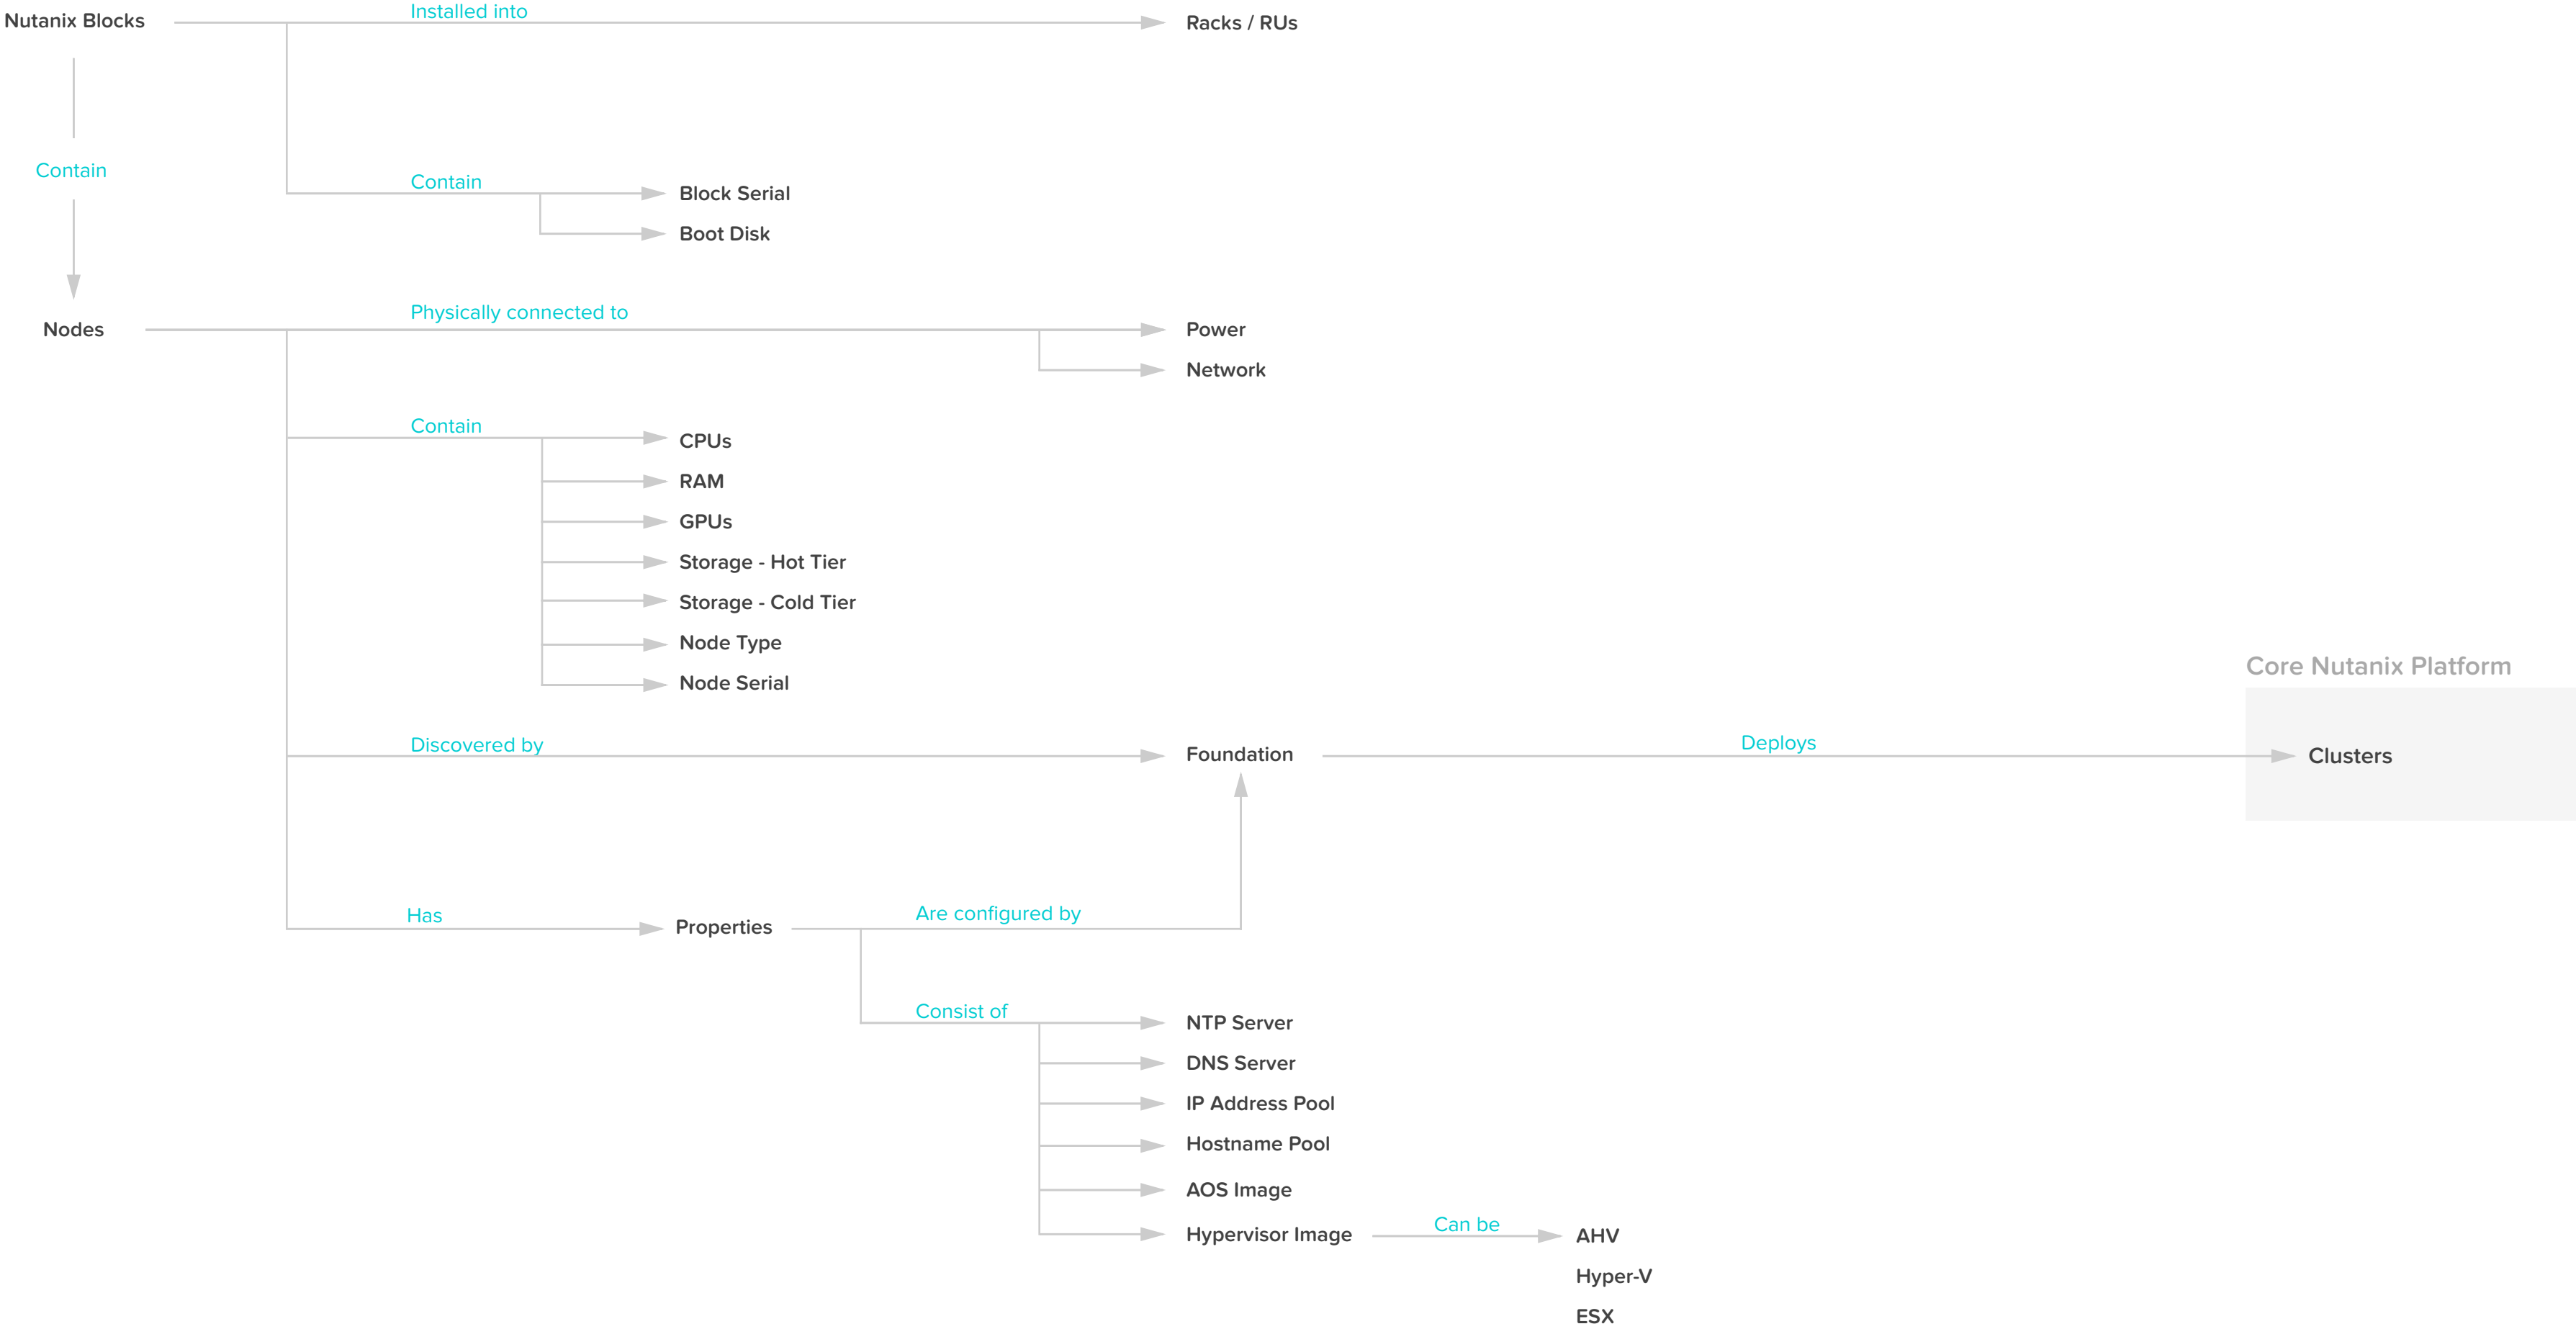

Secure network communication within the data center

# Foundation

Create, configure, and deploy a Nutanix Cluster

# Application Management

Manage applications and orchestrate them across clouds
